

ALSO EFFECTIVE AGAINST
CORONA VIRUSES

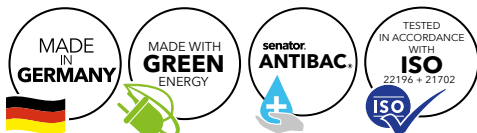

SENATOR® ANTIBAC® RANGE

BESTSELLERS NOW WITH ANTIBACTERIAL FINISH.

The senator® Antibac® range offers antibacterial and antiviral protection of the surface for the entire lifetime of the pen. Available in three popular designs.

What is senator® Antibac®?

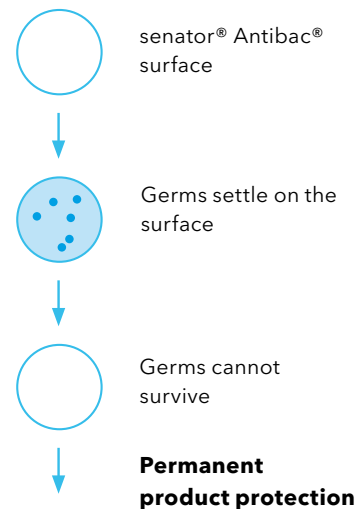

- senator® Antibac® is a ball pen with antibacterial and antiviral protection on the surface.
- This reduces the spread of germs, as they cannot survive on the special surface.
- The active ingredient is processed in the plastic material and can therefore neither be rubbed off nor reduced by other external influences.

Suitable for everyday use, around the clock, always and at all times effective.

Which active ingredient do we use?

- We use a plastic from Germany enriched with silver compounds.
- All plastic parts have an antibacterial effect, tested according to ISO 22196 and an antiviral effect, tested in accordance with ISO 21702.
- senator® Antibac® offers antibacterial protection of 99.9 % within 24 hours and an antiviral protection within 12 hours.

How does senator® Antibac® work?
