RECYCLED PLASTICS

A total of 5 models are now available as an option made of recycled material. For the production, we use an ABS ReCompound based on >95% recycled material. This means reusing industrial production scraps and waste, returns and everyday products. The CO₂ emissions generated in the production of these products are offset by investments in climate protection projects.

All senator® recycled pens are also available in an individual cardboard wallet which we are happy to customise to your specifications.

Use the senator® flyer to send digitally to your customers. Individualised with your company logo on request.
